

## V10-3868 | CYLINDER HEAD COVER

06D 103 469 N\*

AIR CONTROL SYSTEMS | 11103

### PROBLEM

- Too much vacuum in the crankcase system prevents the right oil flow

### REASONS FOR FAILURE

- Using the wrong oil separator

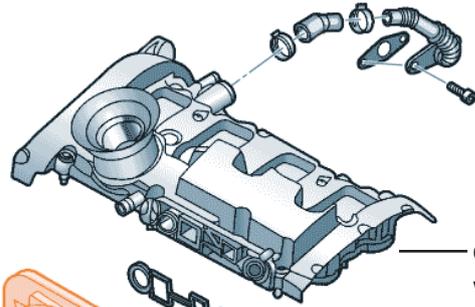

### RECOMMENDED BY THE EXPERTS

- Please check carefully which oil separator is needed
- Use **VAICO Experts Kits+**: cylinder head cover + oil separator, for details see page 2

### DID YOU KNOW?

Cars with engine code **BPY, BWA, BPY, BXIK** have enough self pressure in the pressure room. For those cars it is absolutely necessary to use the oil separator **without throttle valve (06F 129 101 P, V10-9751)**. Otherwise the pressure is additionally increased, which leads to **too much vacuum** and further issues to the breather system.
