ENGINE & TRANSMISSION PARTS  
BY VIEROL

The VAICO quality brand stands for high-quality automotive parts. Our focus is therefore on the heart of the car: the engine and the transmission.

As a specialist in the independent parts market, and one that is known worldwide, we offer an extensive range of products, from suction modules to venting hoses and cylinder head covers. We cover more than 13,000 different vehicle models.

Our VAICO parts even cover 95 per cent of the German vehicle market. Whether transmission filters and sets, oil pans, or housing – VAICO offers the best quality products. Suitable transmission oil is also available, in addition to engine oil, antifreeze or additives.

Our range has been bolstered by innovative repair sets from the Expert Kits+ selection. These kits include sets for changing oil, repair kits with hoses and venting valves or transverse control sets. The Q+ seal identifies parts with OEM quality, just like those made by the original equipment manufacturers.

Our competent expert team works everyday to optimise our VAICO automotive parts and to extend our range. Our aim is to have satisfied customers all around the world.

## OIL PUMPS

The oil pump plays a decisive role in the oil circuit of the engine lubrication system. It provides the necessary oil pressure to deliver the engine oil to the individual lubrication points, such as plain bearings and the crankshaft. Afterwards, the oil is collected again in the oil sump to be pumped out again.

In the internal combustion engine, there are often hydraulic tappets for the valve train that are also actuated by the engine oil. Thus, the oil pump can also be a hydraulic pump at the same time. Oil pumps in engines are usually gear pumps. Absolute precision is essential here, which we at VAICO ensure through our tested quality with minimum tolerances.

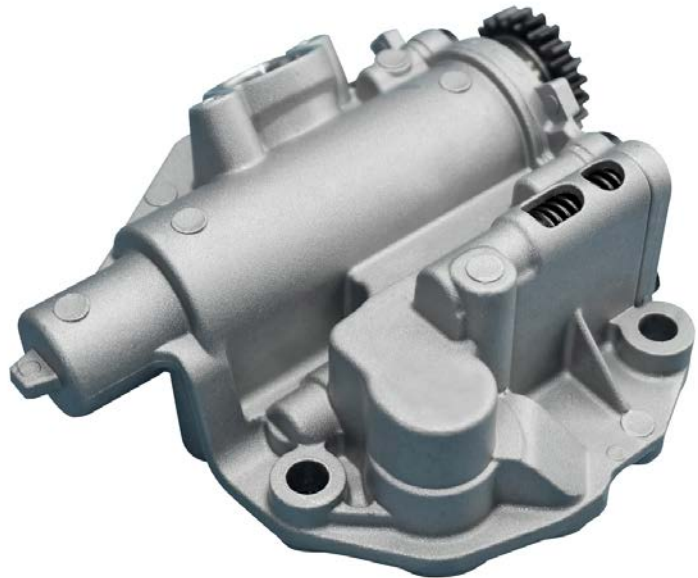

## OIL PUMP FOR 1.8 & 2.0 TFSI ENGINES

OIL PUMPS | 11402

### Function

In all common combustion engines, the oil pump ensures sufficient oil pressure and thus the lubrication of all moving components of the unit. However, the oil pumps in Volkswagen's TFSI engines are particularly susceptible to damage. If the vehicle has not been moved for a long time at low temperatures, clicking noises may come from the engine compartment when the engine is started or shortly afterwards, indicating the defective oil pump. In this case, it is advisable to replace the oil pump as soon as possible to prevent consequential damage to other components.

<b>Audi</b>	A1, A3, A4, A5, A6, A7, Q3, Q5, TT
<b>VW</b>	Beetle, Golf VI, Golf VII, Passat, Polo, Scirocco, Sharan, Tiguan
<b>Seat</b>	Alhambra, Ibiza IV Sportcoupe, Leon
<b>Škoda</b>	Octavia III, Superb III

X-Ref 06H 115 105 FK

**V10-4899**

### SYMPTOMS

- Clicking noise from the engine compartment after starting the engine

### CONSEQUENTIAL DAMAGE

- Increased wear due to insufficient oil pressure
- Engine damage

### REASONS FOR FAILURE

- Vehicle is parked for a long time in low ambient temperatures
- Faulty oil pump

### RECOMMENDED BY THE EXPERT

- Renew oil pump

### OIL PUMPS FROM VAICO

You will find more than 70 articles on [www.vierol-shop.de](http://www.vierol-shop.de)

- Many oil pumps in Q+ original equipment quality
- High market coverage
- Great availability
